

Software Requirements Specification (SRS)

Project: Maaz Portfolio

1. Introduction

Project Name: Maaz Portfolio

Purpose: To showcase professional identity, technical projects, and contact information for a Software Engineer.

Scope: A high-performance, single-page application (SPA) focused on clean design and accessibility.

2. Brand Identity & Design

Color Palette:

Primary Background: #FAFAFA (Off-White)

Primary Accent: #4F46E5 (Indigo)

Typography: Sans-serif (Recommended: Inter or system-default stack).

Layout: Responsive, mobile-first design.

3. Functional Requirements

3.1 Core Sections

Section	Content Requirements
Hero	Professional greeting, tagline (Software Engineer), and call-to-action (CTA).
About Me	Brief bio focusing on core technical stacks and engineering philosophy.
Projects	Showcase key projects (My Book Haven, Blog RAG Assistant). Title, description, link.
Skills	Visual representation of technical proficiencies.
Contact	Contact form or email link/social profile links (LinkedIn/GitHub).

3.2 Technical Requirements

Frontend Stack: Pure HTML5, CSS3, and Vanilla JavaScript.

Styling: CSS variables for color management.

Performance: Optimized assets, lazy loading.

Interactivity: Smooth scrolling.

4. Non-Functional Requirements

Accessibility: WCAG guidelines compliance.

Responsiveness: Mobile to Desktop.

Clean Code: Minimalist approach.

5. Deployment & Maintenance

Recommended platforms: Vercel, GitHub Pages, or Netlify.
